

Manure Directory Sign-up

NHDAMF's Division of Regulatory Services is putting together a directory of farmers and suitable landowners who are able to receive and/or pick-up manure from horse and livestock operations. The directory will list operations which can accept and utilize manure as a soil amendment, compost component, or in the manufacture of loam.

The directory will be distributed to horse and livestock owners who need to remove manure generated on their farm, particularly those who do not have adequate storage facilities or adequate cropland to utilize manure nutrients.

We request that anyone with sites well-suited to accepting manure who is interested in participating in this project download the sign-up and questionnaire form by logging onto our website; www.agriculture.nh.gov then click on Division of Regulatory Services. You may also contact the Division by calling (603) 271-3685 or by sending an email to jconner@agr.state.nh.us or runcles@agr.state.nh.us .
